Name: ____________________ **Date:** ____________________

DIRECTIONS

This assessment covers lessons 4.11.01 to 4.11.03.
Show your work in the box. Write your final answer on the line.
Read every problem carefully. Some problems have more than one part — answer ALL parts.
Take your time. Check your work before you turn in.

1 Area — same units

(a) 6 in × 4 in = ___ sq in
(b) 9 cm × 7 cm = ___ sq cm
(c) Square with 5 ft side. Area = ___ sq ft.

L × W

(a) ___ **(b)** ___ **(c)** ___

2 Mixed units

(a) 2 ft × 8 in = ___ sq in (convert 2 ft to inches first)
(b) Area of a 1 yd 1 ft × 5 ft rectangle = ___ sq ft (1 yd 1 ft = 4 ft)

CONVERT; THEN MULTIPLY

(a) ___ **(b)** ___

3 Missing side

(a) Area = 126 sq cm. Width = 9 cm. Length = ___ cm.
(b) Area = 112 sq m. Length = 8 m. Width = ___ m.
(c) Area = 25 sq cm. Square. Side = ___ cm.

AREA ÷ KNOWN SIDE

(a) ___ **(b)** ___ **(c)** ___

4 Composite — L-shape

An L-shape: outer 7 × 6 cm with a 3 × 2 cm notch cut from top-right.
(a) Find the area by splitting (show both sub-areas).
(b) Verify using the subtraction method.

SPLIT + SUBTRACT

(a) ___ **sq cm** **(b)** ___ **sq cm**

5 Reasoning — same area, different shape

Rectangle A has length 12 in and width 6 in.
(a) Find the area of A.
(b) Find at least one OTHER rectangle (different shape) with the same area as A.
(c) Could a square have the same area? Why or why not?

AREA; FIND PAIR; REASON

(a) ___ **(b)** ___ × ___ **(c)** ___
