DIRECTIONS

This Independent Practice is for Lesson 4.11.04.
Show your work in the box. Write your final answer on the line.
Read each problem carefully. Use a model or picture if it helps.
If you get stuck, re-read the question and look at any example you already worked through in the lesson.

1 Add the sides

Perimeter = sum of all sides. Answer is in LINEAR units (not square).

(a) Rectangle 12 cm × 6 cm. Perimeter = ___ cm.
(b) Square 8 m on each side. Perimeter = ___ m.
(c) Rectangle 15 ft × 7 ft. Perimeter = ___ ft.

ADD ALL FOUR SIDES

(a) ___ **(b)** ___ **(c)** ___

2 Use the shortcut

Rectangle: P = 2 × (L + W). Square: P = 4 × side.
(a) Rectangle 9 cm × 4 cm. Use 2 × (L + W). P = ___ cm.
(b) Square 7 ft. Use 4 × side. P = ___ ft.
(c) Rectangle 20 m × 13 m. P = ___ m.

USE THE FORMULA

(a) ___ **(b)** ___ **(c)** ___

3 Find a missing side

When you know perimeter and one side: subtract the two known sides, then divide by 2.
(a) Perimeter = 40 cm. One side = 7 cm. Other side = ___ cm.
(b) Perimeter = 160 cm. One side = 45 cm. Other side = ___ cm.
(c) Square perimeter = 136 cm. One side = ___ cm.

(P – 2L) ÷ 2

(a) ___ **(b)** ___ **(c)** ___

4 Mixed problems

Two rectangles labeled A and B.
Rectangle A: 12 ft × 7 ft. Find (a) Area. (b) Perimeter.
Rectangle B: Area = 84 sq cm, length = 12 cm. Find (c) Width. (d) Perimeter.

AREA & PERIMETER MIX

(a) ___ **(b)** ___ **(c)** ___ **(d)** ___

5 Word problem — Theo's dog pen

Theo wants to build a square dog pen with a perimeter of exactly 136 cm.
(a) Find one side of the pen.
(b) Find the area of the pen.
(c) Theo decides to make a RECTANGULAR pen with the same perimeter (136 cm) but length 40 cm. Find its width.
(d) Find the area of this rectangular pen. Which has bigger area — the square or the rectangle?

SIDE; AREA; MISSING SIDE; COMPARE

(a) ___ **(b)** ___ **(c)** ___ **(d)** ___
