Name: ____________________ **Date:** ____________________

DIRECTIONS

This Independent Practice is for Lesson 4.11.03.
Show your work in the box. Write your final answer on the line.
Read each problem carefully. Use a model or picture if it helps.
If you get stuck, re-read the question and look at any example you already worked through in the lesson.

1 Split and add — L-shape

An L-shape with outer 7 cm × 5 cm and a 3 cm × 2 cm notch cut from top-right.
Find the area two ways:
(a) SPLIT method: divide into two rectangles. Show both sub-areas. Then add.
(b) SUBTRACTION method: outer rectangle area minus the notch area.
(c) Do both methods give the same total?

BOTH METHODS

(a) ___ **(b)** ___ **(c)** ___

2 T-shape — Theo's patio

Theo is tiling a T-shaped patio.
Top rectangle: 8 ft × 3 ft.
Stem rectangle: 4 ft × 5 ft.
(a) Area of the top? (b) Area of the stem? (c) Total area?

TWO AREAS; ADD

(a) ___ (b) ___ (c) ___ sq ft

3 Composite with subtraction

A rectangular field is 10 m long and 6 m wide. A square sandbox in one corner is 3 m × 4 m and is NOT part of the play area.
(a) Area of the full field?
(b) Area of the sandbox cut-out?
(c) Play area = field – sandbox = ___ sq m

OUTER – CUT-OUT

(a) ___ (b) ___ (c) ___

4 Three-rectangle composite

A composite figure has three rectangles glued in a row:
Rectangle A: 3 cm × 5 cm. Rectangle B: 4 cm × 5 cm. Rectangle C: 2 cm × 5 cm.
(a) Area of A. (b) Area of B. (c) Area of C. (d) Total.

THREE AREAS; ADD

(a) ___ (b) ___ (c) ___ (d) ___ sq cm

5 Cement path

A rectangular flower bed is 13 m long and 10 m wide. It has a cement path 3 m wide around it (on all four sides).
(a) Find the OUTER dimensions of the full area (flower bed + path).
(b) Find the OUTER area.
(c) Find the area of the cement path only (outer area – flower bed area).

OUTER – INNER = PATH

(a) ___ × ___ (b) ___ sq m (c) ___ sq m
