

Name: _____

Date: _____

DIRECTIONS

This assessment covers lessons 4.11.01 to 4.11.05.

Show your work in the box. Write your final answer on the line.

Read every problem carefully. Some problems have more than one part — answer ALL parts.

Take your time. Check your work before you turn in.

1 Area of rectangles

(a) $9 \text{ cm} \times 7 \text{ cm} = \underline{\hspace{1cm}}$ sq cm

(b) $12 \text{ ft} \times 5 \text{ ft} = \underline{\hspace{1cm}}$ sq ft

(c) Square 6 m. Area = $\underline{\hspace{1cm}}$ sq m.

L × W

(a) $\underline{\hspace{1cm}}$ (b) $\underline{\hspace{1cm}}$ (c) $\underline{\hspace{1cm}}$

2 Mixed units + missing side

(a) Area = 240 sq in. Length = 2 ft. Width = $\underline{\hspace{1cm}}$ in.

(b) Maya's garden: $8 \text{ ft} \times 5 \text{ ft}$. Area = $\underline{\hspace{1cm}}$ sq ft.

(c) Area = 144 sq ft. Length = 8 ft. Width = $\underline{\hspace{1cm}}$ ft.

CONVERT; MULTIPLY; DIVIDE

(a) $\underline{\hspace{1cm}}$ (b) $\underline{\hspace{1cm}}$ (c) $\underline{\hspace{1cm}}$

3 Composite figure area

An L-shape: outer 9×7 ft, notch 5×4 ft cut from top-right.

- (a) Find the area by SPLITTING.
- (b) Find it again by SUBTRACTING from the outer rectangle.
- (c) Do both answers match?

SPLIT; SUBTRACT; COMPARE

(a) ____ (b) ____ (c) ____

4 Perimeter — rectangles

- (a) Rectangle $12 \text{ cm} \times 6 \text{ cm}$. Perimeter = ____ cm.
- (b) Square 8 m. Perimeter = ____ m.
- (c) Use the shortcut $P = 2 \times (L + W)$ for a $15 \text{ ft} \times 7 \text{ ft}$ rectangle.

ADD OR FORMULA

(a) ____ (b) ____ (c) ____

5 Missing side from perimeter

- (a) Perimeter 40 cm, one side 7 cm. Other side = ____ cm.
(b) Square perimeter = 136 cm. Side = ____ cm.
(c) Perimeter 160 cm, one side 45 cm. Other side = ____ cm.

$$(P - 2L) \div 2$$

(a) ____ (b) ____ (c) ____

6 Composite-figure perimeter

L-shape: outer 7×5 cm, notch 3×2 cm cut from top-right.

- (a) Find the two missing side pieces.
(b) Add all six sides for the perimeter.
(c) Verify: perimeter of L-shape = perimeter of outer 7×5 rectangle = ____.

FIND MISSING; SUM; VERIFY

(a) ____ (b) ____ cm (c) ____ cm

7 Word problem — Asher's rug

Asher has an L-shaped rug, $8\text{ ft} \times 6\text{ ft}$ with a $3\text{ ft} \times 2\text{ ft}$ notch cut from one corner.

- (a) Find the AREA of the rug.
- (b) Find the PERIMETER of the rug (add all 6 sides).
- (c) If ribbon costs \$2/ft, how much will it cost to edge the whole rug?

AREA; PERIMETER; COST

(a) ____ sq ft (b) ____ ft (c) \$ ____

8 Compare area and perimeter

A square has side 6 ft. A rectangle has the SAME PERIMETER but length 10 ft.

- (a) Find the square's perimeter and area.
- (b) Find the rectangle's width and area.
- (c) Which has the bigger area? By how much?

TWO SHAPES; COMPARE

Square: P ____, A ____; Rect: W ____, A ____; Diff: ____
