

Name: _____

Date: _____

DIRECTIONS

This Independent Practice is for Lesson 4.11.02.

Show your work in the box. Write your final answer on the line.

Read each problem carefully. Use a model or picture if it helps.

If you get stuck, re-read the question and look at any example you already worked through in the lesson.

1 Find the missing side — same units

Area $\div$ known side = missing side.

(a) Area = 126 sq cm. Width = 9 cm. Length = ____ cm.

(b) Area = 112 sq m. Length = 8 m. Width = ____ m.

(c) Area = 144 sq ft. Length = 8 ft. Width = ____ ft.

AREA $\div$ KNOWN SIDE

(a) ____ (b) ____ (c) ____

2 Squares

For a square, both sides are equal. So $\text{Area} = \text{side} \times \text{side}$. $\text{Side} = \sqrt{\text{Area}}$.

(a) Area = 25 sq cm. Side = ____ cm.

(b) Area = 49 sq ft. Side = ____ ft.

(c) Area = 100 sq in. Side = ____ in.

FIND THE NUMBER $\times$ ITSELF

(a) ____ (b) ____ (c) ____

3 Mixed units

Convert sides into the same unit FIRST, then divide.

(a) Area = 104 sq in. Width = $\frac{2}{3}$ ft (= 8 in). Length = ____ in.

(b) Area = 240 sq in. Length = 2 ft. Width = ____ in.

CONVERT; THEN DIVIDE

(a) ____ (b) ____

4 Same area, find the missing side

Rectangle A has length 10 in and width 6 in.

Rectangle B has the SAME area as Rectangle A but its width is 4 in.

(a) What is the area of Rectangle A?

(b) What is the length of Rectangle B?

FIND A; USE FOR B

(a) ____ sq in (b) ____ in

5 Find and fix

A student wrote: "If area = 60 sq cm and one side = 12 cm, the other side = $60 \times 12 = 720$ cm."

(a) What did the student do wrong?

(b) Find the correct other side.

CORRECT OPERATION

(a) ____ (b) ____ cm

6 Word problem — Imani's flag

Imani is sewing a rectangular flag with area 96 sq in. The width is 8 in.

(a) Find the length of the flag.

(b) Imani makes a SECOND flag with the same area but width 6 in. What length should it be?

FIND LENGTH; SAME AREA

(a) ____ in (b) ____ in
