

Name: _____

Date: _____

DIRECTIONS

This Independent Practice is for Lesson 4.12.03.

Show your work in the box. Write your final answer on the line.

Read each problem carefully. Use a model or picture if it helps.

If you get stuck, re-read the question and look at any example you already worked through in the lesson.

1 10×10 grid → fraction

A 10×10 grid has 100 small squares.

(a) 23 of 100 squares shaded. Fraction = ____/100.

(b) 7 of 100 squares shaded. Fraction = ____/100.

(c) 50 of 100 squares shaded. Fraction = ____/100.

COUNT SHADED / 100

(a) ____ (b) ____ (c) ____

2 10×10 grid → decimal

Same models. Write as decimals (two decimal places).

(a) 23 of 100 shaded = ____

(b) 7 of 100 shaded = ____ (careful — write 0.0?)

(c) 50 of 100 shaded = ____

0.HUNDREDTHS

(a) ____ (b) ____ (c) ____

3 Both forms

For each shaded grid, write BOTH the fraction AND the decimal.

(a) 41 shaded: ____/100 = ____

(b) 9 shaded: ____/100 = ____

(c) 80 shaded: ____/100 = ____

FRACTION = DECIMAL

(a) ____ = ____ (b) ____ = ____ (c) ____ = ____

4 Compare tenths vs hundredths

- (a) 3 of 10 columns shaded = 30 of 100 squares shaded. Fraction: $3/10 = \underline{\hspace{1cm}}/100$.
(b) Decimal: $0.3 = \underline{\hspace{1cm}}$
(c) What do you notice about 0.3 and 0.30?

EQUIVALENT REPRESENTATIONS

(a) (b) (c)
