

Name: _____

Date: _____

DIRECTIONS

This Independent Practice is for Lesson 4.03.05.

Show your work in the box. Write your final answer on the line.

Read each problem carefully. Use a model or picture if it helps.

If you get stuck, re-read the question and look at any example you already worked through in the lesson.

1 List and scan

List every factor of each number. Circle the factors that appear in BOTH lists.

(a) 12 and 18 (b) 16 and 24

WRITE BOTH LISTS; CIRCLE COMMON FACTORS

(a) common: ____ (b) common: ____

2 Greatest common factor

Find the BIGGEST factor that BOTH numbers share.

(a) 8 and 12 (b) 15 and 20 (c) 18 and 30 (d) 24 and 36

LIST FACTORS; PICK THE LARGEST SHARED

(a) ____ (b) ____ (c) ____ (d) ____

3 When one number divides the other

For each pair, the smaller number IS a factor of the bigger. The greatest common factor is the smaller number itself.

(a) 6 and 18 (b) 5 and 25 (c) 8 and 32

CHECK THAT THE SMALLER DIVIDES THE BIGGER

(a) ___ (b) ___ (c) ___

4 Decide YES or NO

Is the given number a common factor of BOTH? Show your division check.

(a) Is 4 a common factor of 12 and 20?

(b) Is 6 a common factor of 18 and 30?

(c) Is 8 a common factor of 16 and 28?

DIVIDE BOTH NUMBERS BY THE GIVEN ONE

(a) ___ (b) ___ (c) ___

5 Word problem - Felix's snack bags

Felix has 18 granola bars and 24 juice boxes. He wants to make identical snack bags with no leftovers - same number of bars in every bag, same number of juice boxes in every bag.

- (a) What is the GREATEST number of identical snack bags he can make?
(b) How many bars and how many juice boxes go in each bag?

FIND THE GREATEST COMMON FACTOR OF 18 AND 24

(a) ____ bags (b) ____ bars, ____ juice boxes
