

Name: _____

Date: _____

DIRECTIONS

This Independent Practice is for Lesson 4.04.02.

Show your work in the box. Write your final answer on the line.

Read each problem carefully. Use a model or picture if it helps.

If you get stuck, re-read the question and look at any example you already worked through in the lesson.

1 Estimate, then compute

For $5,172 \times 4$:

- (a) Round 5,172 to the nearest THOUSAND, then multiply by 4.
- (b) Round 5,172 to the nearest HUNDRED, then multiply by 4.
- (c) Find the exact product using the standard algorithm.
- (d) Which estimate was closer?

SHOW EACH ESTIMATE AND THE EXACT

(a) ____ (b) ____ (c) ____ (d) ____

2 Standard algorithm fluency

Find each product. Show the regrouping.

- (a) $2,438 \times 3$ (b) $1,769 \times 5$ (c) $4,206 \times 6$ (d) $3,825 \times 7$

STACK AND MULTIPLY EACH

(a) ____ (b) ____ (c) ____ (d) ____

3 Partial products / area model

Use an area model (place-value split) for each. Show the partial products.

(a) $1,243 \times 4 = (1,000 \times 4) + (200 \times 4) + (40 \times 4) + (3 \times 4) = \underline{\hspace{2cm}}$

(b) $2,156 \times 3 = (\underline{\hspace{1cm}} \times 3) + (\underline{\hspace{1cm}} \times 3) + (\underline{\hspace{1cm}} \times 3) + (\underline{\hspace{1cm}} \times 3) = \underline{\hspace{2cm}}$

SHOW ALL FOUR PARTIAL PRODUCTS

(a) $\underline{\hspace{2cm}}$ (b) $\underline{\hspace{2cm}}$

4 Word problem — Atlas's library

Atlas counts 1,348 books on each of the library's 6 floors.

(a) Estimate the total by rounding to the nearest thousand.

(b) Find the exact total.

ESTIMATE FIRST, THEN EXACT

(a) $\approx \underline{\hspace{2cm}}$ (b) Exact: $\underline{\hspace{2cm}}$

5 Critical thinking — error hunt

Felix wrote: " $3,425 \times 4 = 12,600$." His estimate said it should be near 14,000.

(a) Was Felix close to his estimate? (b) Find the correct product. (c) Where did Felix go wrong?

RE-DO THE MULTIPLICATION CAREFULLY

(a) ____ (b) ____ (c) ____
