

Name: _____

Date: _____

DIRECTIONS

This Independent Practice is for Lesson 4.04.06.

Show your work in the box. Write your final answer on the line.

Read each problem carefully. Use a model or picture if it helps.

If you get stuck, re-read the question and look at any example you already worked through in the lesson.

1 Standard algorithm fluency

Find each product using the standard algorithm. Stack the two partial rows.

(a) 47×35 (b) 128×24 (c) 356×47 (d) 824×63

STACK, SHIFT, AND ADD

(a) ____ (b) ____ (c) ____ (d) ____

2 Why the shift

For 84×36 :

(a) First partial row (84×6) = ____

(b) Second partial row (84×30) = ____ — what place does the second row START in?

(c) Add the two rows for the final product.

SHOW BOTH ROWS WITH THE SHIFT

(a) ____ (b) ____ start in ____ place (c) ____

3 Mixed practice

Find each product. Choose partial products OR standard algorithm.

(a) 92×47 (b) 214×53 (c) 405×36 (d) 718×29

SHOW EACH MULTIPLICATION

(a) ____ (b) ____ (c) ____ (d) ____

4 Word problem — Cora's bandages

A first-aid kit holds 145 bandages. The school orders 38 kits for the year.

(a) Estimate the total bandages. (b) Find the exact total using the standard algorithm.

STACK 145×38

(a) $\approx$ ____ (b) Exact: ____

5 Critical thinking — Felix's mistake

Felix wrote 235×24 like this: $235 \times 4 = 940$ $235 \times 2 = 470$ Total = 1,410.

- (a) Why is 1,410 way too small? (b) What did Felix forget about the shift?
(c) Find the correct product.

235×2 IS REALLY 235×20

(a) ____ (b) ____ (c) ____
