

Name: _____

Date: _____

DIRECTIONS

This Independent Practice is for Lesson 4.08.02.

Show your work in the box. Write your final answer on the line.

Read each problem carefully. Use a model or picture if it helps.

If you get stuck, re-read the question and look at any example you already worked through in the lesson.

1 Multiply — fraction times whole

Multiply the whole number by the top number of the fraction. Keep the bottom number.

(a) $3 \times \frac{3}{4}$ (b) $5 \times \frac{2}{3}$ (c) $7 \times \frac{2}{9}$ (d) $2 \times \frac{3}{7}$

WHOLE $\times$ TOP; KEEP BOTTOM

(a) ____ (b) ____ (c) ____ (d) ____

2 Express answers as mixed numbers

After multiplying, convert any improper fraction to a mixed number.

(a) $7 \times \frac{5}{12}$ (b) $3 \times \frac{3}{5}$ (c) $9 \times \frac{3}{10}$ (d) $5 \times \frac{5}{6}$

MULTIPLY + CONVERT TO MIXED

(a) ____ (b) ____ (c) ____ (d) ____

3 Larger numbers

Same procedure. Take your time.

(a) $5 \times \frac{3}{7}$ (b) $7 \times \frac{5}{11}$ (c) $8 \times \frac{7}{15}$

MULTIPLY + CONVERT

(a) ____ (b) ____ (c) ____

4 Word problem — broccoli bags

A bag of broccoli weighs $\frac{3}{4}$ of a pound. Mrs. Lin buys 3 bags.

What is the total weight of all the broccoli? Give the answer as a mixed number of pounds.

$3 \times \frac{3}{4}$; CONVERT

Total weight: ____ lb

5 Critical thinking — does the answer make sense?

A student says $4 \times \frac{2}{3} = \frac{8}{12}$. He multiplied tops AND bottoms.

(a) What did he get wrong?

(b) Show the correct procedure and the simplest answer.

NAME THE ERROR + FIX

(a) ____ (b) ____
