

Name: _____

Date: _____

DIRECTIONS

This Independent Practice is for Lesson 4.08.05.

Show your work in the box. Write your final answer on the line.

Read each problem carefully. Use a model or picture if it helps.

If you get stuck, re-read the question and look at any example you already worked through in the lesson.

1 Fraction of a number — divide first

To find a unit fraction of a number, divide by the bottom number.

(a) $\frac{1}{5}$ of 15 (b) $\frac{1}{2}$ of 8 (c) $\frac{1}{3}$ of 6 (d) $\frac{1}{6}$ of 12

DIVIDE BY THE BOTTOM

(a) ____ (b) ____ (c) ____ (d) ____

2 Fraction of a number — divide then multiply

For a non-unit fraction: divide by the bottom number, then multiply by the top number.

(a) $\frac{4}{5}$ of 15 (b) $\frac{5}{8}$ of 16 (c) $\frac{2}{3}$ of 6

DIVIDE BY BOTTOM; $\times$ TOP

(a) ____ (b) ____ (c) ____

3 More practice

Use the same two-step procedure for each.

(a) $\frac{5}{6}$ of 12 (b) $\frac{1}{7}$ of 21 (c) $\frac{3}{7}$ of 21 (d) $\frac{5}{7}$ of 21

DIVIDE BY BOTTOM; $\times$ TOP

(a) ____ (b) ____ (c) ____ (d) ____

4 Word problem — basketball

Sasha scored 21 points in a game. $\frac{3}{7}$ of her points came from 3-point shots.

How many points came from 3-point shots?

$\frac{3}{7}$ OF 21

3-point points: ____

5 Critical thinking — which is bigger?

Compare without doing all the math first.

(a) Which is bigger: $\frac{1}{3}$ of 6 or $\frac{1}{2}$ of 8? Show why.

(b) Which is bigger: $\frac{5}{6}$ of 12 or $\frac{5}{7}$ of 21? Show why.

COMPUTE BOTH; COMPARE

(a) ____ (b) ____
