

Name: \_\_\_\_\_

Date: \_\_\_\_\_

### DIRECTIONS

This Independent Practice is for Lesson 4.08.06.

Show your work in the box. Write your final answer on the line.

Read each problem carefully. Use a model or picture if it helps.

If you get stuck, re-read the question and look at any example you already worked through in the lesson.

### 1 Fraction times whole — algorithm

Multiply the top number by the whole. Keep the bottom number. Simplify.

(a)  $\frac{5}{9} \times 6$  (b)  $\frac{1}{2} \times 9$  (c)  $\frac{1}{3} \times 10$

TOP  $\times$  WHOLE; KEEP BOTTOM

(a) \_\_\_\_ (b) \_\_\_\_ (c) \_\_\_\_

### 2 Express as a mixed number in simplest form

Convert if the answer is improper.

(a)  $\frac{2}{9} \times 4$  (b)  $\frac{3}{4} \times 30$  (c)  $\frac{7}{8} \times 20$

MULTIPLY + SIMPLIFY + CONVERT

(a) \_\_\_\_ (b) \_\_\_\_ (c) \_\_\_\_

**3 One more**

Same procedure.

$$\frac{3}{7} \times 18$$

MULTIPLY + SIMPLIFY + CONVERT

Answer: \_\_\_\_

**4 Word problem — bag of beans**Does  $\frac{5}{8}$  of a 12-pound bag of beans weigh more or less than twelve  $\frac{5}{8}$ -pound bags?

- (a) How much does  $\frac{5}{8}$  of a 12-pound bag weigh?
- (b) How much do twelve  $\frac{5}{8}$ -pound bags weigh in total?
- (c) Which is more? By how much?

COMPUTE BOTH; COMPARE

(a) \_\_\_\_ (b) \_\_\_\_ (c) \_\_\_\_

**5 Critical thinking — order matters?**

Find  $3/4 \times 30$  in two ways:

- (a) Multiply 30 by the top number 3 first, then divide by 4.
- (b) Divide 30 by 4 first, then multiply by 3.
- (c) Are the answers the same? Why?

TWO ORDERS, COMPARE

(a) \_\_\_\_ (b) \_\_\_\_ (c) \_\_\_\_
