

Name: _____

Date: _____

DIRECTIONS

This Independent Practice is for Lesson 4.09.01.

Show your work in the box. Write your final answer on the line.

Read each problem carefully. Use a model or picture if it helps.

If you get stuck, re-read the question and look at any example you already worked through in the lesson.

1 Mrs. Perez's reading groups

Mrs. Perez split her class into 6 reading groups. The number of students in each group:

4, 3, 5, 4, 3, 2

(a) Find the MODE (the number that appears most often).

(b) Find the MEDIAN (put the numbers in order; pick the middle — or the average of the two middle numbers).

(c) Find the RANGE (largest minus smallest).

ORDER THE NUMBERS FIRST

(a) Mode: ____ (b) Median: ____ (c) Range: ____

2 Mr. Helfer's class — homework hours

Mr. Helfer asked students how many hours of homework they did last week.

Here is the data, already in order:

0, 1, 1, 1, 2, 2, 3, 3, 3, 3, 4, 5

(a) Find the MODE.

(b) Find the MEDIAN.

(c) Find the RANGE.

COUNT REPEATS; PICK MIDDLE; SUBTRACT

(a) ____ (b) ____ (c) ____

3 Steps walked

Sarah recorded the number of laps each of her friends walked at recess:

2, 3, 9, 2, 5, 14, 2, 8, 9, 0, 2, 9

(a) Reorder the data from smallest to largest.

(b) Find the MODE.

(c) Find the MEDIAN.

(d) Find the RANGE.

REORDER FIRST; THEN MODE / MEDIAN / RANGE

(a) ordered: ____ (b) ____ (c) ____ (d) ____

4 Critical thinking — what each number tells you

Look back at problem 3.

- (a) Which value (mode, median, or range) tells you how spread out the data is?
- (b) Which value tells you the MOST COMMON number of laps walked?
- (c) Which value tells you the middle of the data?

MATCH EACH WORD TO ITS MEANING

(a) ____ (b) ____ (c) ____
