### DIRECTIONS

This Independent Practice is for Lesson 4.09.02.

Show your work in the box. Write your final answer on the line.

Read each problem carefully. Use a model or picture if it helps.

If you get stuck, re-read the question and look at any example you already worked through in the lesson.

### 1 Old Faithful eruption durations

Old Faithful is a famous geyser. Here are 20 eruption durations (in minutes):

2, 3, 4, 4, 2, 3, 5, 4, 3, 3, 4, 5, 2, 4, 3, 5, 4, 3, 4, 2

(a) Make a frequency table by hand. List each duration (2, 3, 4, 5) and count how many eruptions match.

(b) Describe what a line plot of this data would look like — which value has the tallest column?

BUILD TABLE; FIND TALLEST X COLUMN

(a) tally table (b) Tallest: \_\_\_\_ min

**2 Jaiden's travel times — complete the line plot**

Jaiden surveyed 30 students about their travel time to school (in minutes):

10, 20, 5, 25, 15, 10, 30, 15, 25, 20, 25, 40, 30, 15, 35, 20, 25, 35, 15, 30, 20, 40, 10, 30, 15, 10, 50, 45, 20, 25

(a) Use this data to complete a line plot below (mark an X above each minute value for each student).

(b) Find the MODE.

(c) Find the RANGE.

(d) What fraction of the students took MORE THAN 30 minutes to get to school?

BUILD LINE PLOT; COUNT > 30; PART/TOTAL

(b) \_\_\_\_ (c) \_\_\_\_ (d) \_\_\_\_

**3 4th-grade sleep hours (quarter-hours)**

A 4th-grade class recorded how many hours they slept (rounded to the nearest quarter hour).

12 students reported:

9,  $8\frac{3}{4}$ ,  $9\frac{1}{4}$ , 8, 9,  $9\frac{1}{2}$ ,  $9\frac{1}{4}$ ,  $8\frac{3}{4}$ , 9, 10,  $8\frac{1}{2}$ ,  $9\frac{1}{2}$

(a) Complete a line plot below. Use a scale in quarter hours from 8 to 10.

(b) How many students are in the data set in total?

(c) How many students did NOT get exactly 9 hours of sleep?

(d) What fraction of the students got AT LEAST 9 hours of sleep? Express in simplest form.

PLOT EACH X; COUNT  $\geq 9$ ; PART/TOTAL

(b) \_\_\_\_ (c) \_\_\_\_ (d) \_\_\_\_
