

DIRECTIONS

Show your work in the box for each problem.

Write your final answer on the answer line (or in the blanks shown).

Use the words and strategies from lessons 4.05.01 to 4.05.02.

Name: _____

Date: _____

1 Number bonds

Use a number bond for each.

(a) $63 \div 3$ (b) $84 \div 4$ (c) $96 \div 8$

SHOW EACH BOND AND THE TWO QUOTIENTS

(a) _____ (b) _____ (c) _____

2 Pattern stacks

Fill in each stack.

(a) $84 \div 7 = \underline{\quad}$, $840 \div 7 = \underline{\quad}$, $8,400 \div 7 = \underline{\quad}$

(b) $72 \div 6 = \underline{\quad}$, $720 \div 6 = \underline{\quad}$, $7,200 \div 6 = \underline{\quad}$

COMPUTE BASE FACT, THEN SHIFT

(a) _____ (b) _____

3 Three estimates

For $743 \div 3$, compute each estimate.

(a) $600 \div 3 = \underline{\quad}$ (b) $750 \div 3 = \underline{\quad}$ (c) $900 \div 3 = \underline{\quad}$

(d) Which is closest to the actual?

SHOW EACH ESTIMATE AND THE ACTUAL

(a) (b) (c) (d)

4 Long division

Find each quotient with remainder.

(a) $848 \div 3$ (b) $715 \div 2$ (c) $556 \div 8$

SHOW EACH LONG DIVISION

(a) (b) (c)

5 Big quotients (mental)

Find each in your head.

(a) $40,000 \div 8$ (b) $1,500 \div 5$ (c) $72,000 \div 4$

USE $\div 10$ PATTERN OR PLACE-VALUE

(a) ____ (b) ____ (c) ____

6 Couch-table-chair

A couch costs \$360. The couch costs TWICE the table; the table costs THREE TIMES the chair. How much does the chair cost?

SHOW BOTH DIVISIONS

Chair: \$ ____

7 MODEL — number bond

Draw a number bond for $96 \div 8$ that splits 96 into two pieces both divisible by 8.
Then find the quotient using the bond.

DRAW THE BOND AND COMPUTE

$96 \div 8 =$ _____

8 EXPLAIN — divisor-friendly rounding

Why does rounding the dividend to a MULTIPLE OF THE DIVISOR usually give the closest estimate?
Use $4,975 \div 3$ as your example.

WRITE YOUR EXPLANATION

My explanation: _____
