

Name: _____

Date: _____

DIRECTIONS

This assessment covers lessons 4.02.01 to 4.02.05 (entire unit).
 Show your work in the box. Write your final answer on the line.
 Read every problem carefully. Some problems have more than one part — answer ALL parts.
 Take your time. Check your work before you turn in.

1 Algorithm fluency

- (a) $8,968 + 4,755$ (b) $145,376 + 89,648$
 (c) $45,082 - 17,569$ (d) $80,205 - 47,398$

COLUMN WORK FOR ALL FOUR

(a) ____ (b) ____ (c) ____ (d) ____

2 Compensation

- Use compensation.
 (a) $3,996 + 2,847$ (b) $5,000 - 3,997$

ADJUST, COMPUTE, FIX

(a) ____ (b) ____

3 Counting up to subtract

Use counting up.

(a) $803 - 478$ (b) $8,200 - 2,468$

SHOW THE JUMPS

(a) ____ (b) ____

4 Estimate, then compute

Round to the nearest 1,000 to estimate. Then find exact.

(a) $27,489 + 36,275$ (b) $80,000 - 23,456$

ESTIMATE + EXACT

(a) est ____ exact ____ (b) est ____ exact ____

5 Word problem — addition

A baker made 1,475 cupcakes Monday and 2,890 Tuesday. How many total?

SHOW WORK

Total: ____

6 Word problem — subtraction

A toy store had 8,000 items. 3,247 were left after a sale. How many sold?

SHOW WORK

Sold: ____

7 Two-step problem

A school collected 4,250 books in the morning and 3,180 in the afternoon. They donated 5,900.

(a) Total collected? (b) Left after donation?

TWO STEPS

(a) ____ (b) ____

8 Comparison problem

Mia's family drove 4,287 miles. Liam's drove 6,950 miles.

(a) How much farther did Liam's family drive?

(b) Total miles together?

(a) SUBTRACT (b) ADD

(a) ____ (b) ____

9 MODEL — bar model

Draw a bar model for: "A store had 12,000 shirts. They sold 4,587. They got 2,300 more."
Use the model to find how many shirts they have now.

DRAW MODEL AND LABEL

Now: ____ shirts

10 EXPLAIN — choose your strategy

When you face an addition or subtraction problem, how do you decide whether to use the standard algorithm, compensation, or counting up? Use $5,003 - 2,998$ as an example to explain your choice.

WRITE YOUR REFLECTION

My explanation:
