

DIRECTIONS

Show your work in the box for each problem.

Write your final answer on the answer line (or in the blanks shown).

Use the words and strategies from lessons 4.05.01 to 4.05.04 (entire unit).

Name: _____

Date: _____

1 Mental division fluency

Find each in your head.

(a) $72 \div 3$ (use a bond) (b) $8,400 \div 7$ (pattern) (c) $45,000 \div 3$ (place-value)

SHOW YOUR MENTAL STEPS

(a) ____ (b) ____ (c) ____

2 Three estimates compared

For $4,975 \div 3$:

(a) Round to 3,000 $\rightarrow$ ____ (b) Round to 4,500 $\rightarrow$ ____ (c) Round to 6,000 $\rightarrow$ ____

(d) Find the actual. (e) Which estimate was closest?

SHOW EACH ESTIMATE AND THE ACTUAL

(a) ____ (b) ____ (c) ____ (d) ____ (e) ____

3 Lead-digit predictions

Predict the number of digits in each quotient. Verify.

(a) $7,489 \div 8$ (b) $9,875 \div 4$ (c) $4,200 \div 6$

COMPARE LEAD DIGIT TO DIVISOR

(a)___ (b)___ (c)___ _____

4 Long division

Find each quotient and remainder.

(a) $8,375 \div 6$ (b) $9,971 \div 2$ (c) $7,761 \div 9$ (d) $3,945 \div 5$

SHOW EACH LONG DIVISION

(a)___ (b)___ (c)___ (d)___ _____

5 Word problem — round up

A school takes 234 students on a field trip. Each bus holds 50.
How many buses needed? Explain why you round.

SHOW DIVISION + REMAINDER LOGIC

Buses needed: _____

6 Word problem — ignore remainder

A factory packs 500 candies into boxes of 9.
How many FULL boxes can they pack? How many candies are left over?

SHOW DIVISION + INTERPRETATION

Full boxes: _____ **Left over:** _____

7 Word problem — egg cartons (three jobs)

A school packs 2,560 eggs into cartons of 6.

(a) How many full cartons? (b) Eggs left over? (c) Cartons needed if every egg must ship?

COMPUTE $2,560 \div 6$ AND ANSWER ALL THREE

(a) ____ (b) ____ (c) ____

8 Two-step word problem

A library has 1,248 books. They go on shelves of 8 books each.

(a) How many full shelves? (b) Plus 64 books on a display table — how many total books on shelves AND table?

STEP 1: DIVIDE. STEP 2: MULTIPLY AND ADD.

(a) ____ (b) ____

9 MODEL — bar model

Draw a bar model for: "A grandma shares \$540 equally among 4 grandchildren."
Use the bar to find each child's share.

DRAW THE BAR AND LABEL

Each child: \$_____

10 EXPLAIN — Unit 5 reflection

Across Unit 5 you learned mental math for division (number bonds, patterns), estimation (three estimates, divisor-friendly), long division with lead-digit, and word problems with three remainder jobs.

In one paragraph, explain how all four pieces work together when you face a real division word problem.

WRITE YOUR REFLECTION

My explanation: _____
